

## Information under the Consumer Protection Act

The application for the provision of a commercial guarantee shall contain information on:  
The rights of consumers arising from the guarantee under Art. 112 - 115, and shall clearly state that the commercial guarantee shall not affect the rights of consumers arising from the guarantee under Art. 112 - 115, and more precisely that, regardless of the commercial guarantee, the seller shall be liable for the lack of conformity of the consumer good with the sales contract in accordance with the guarantee under Art. 112 - 115;

**Art. 112.** (1) In the event of non-conformity of the consumer good with the sales contract, the consumer shall have the right to file a complaint by requesting the seller to bring the good into conformity with the sales contract. In this case, the consumer may choose between repairing the good or replacing it with a new one, unless this is impossible or the method of compensation chosen by him is disproportionate compared to the other.

(2) A method of redress for the consumer shall be deemed to be disproportionate if its use imposes costs on the seller which, in comparison with the other method of redress, are unreasonable, taking into account: 1. the value of the consumer goods if there had been no lack of conformity; 2. the significance of the lack of conformity; 3. the possibility of offering the consumer another method of redress which does not entail significant inconvenience for him.

**Art. 113.** (1) (New - SG No. 18/2011) Where the consumer goods do not conform to the sales contract, the seller shall be obliged to bring them into conformity with the sales contract. (2) (Previous para. 1 - SG, issue 18 of 2011) The consumer goods shall be brought into conformity with the sales contract within one month from the date of the consumer's complaint.

(3) (Previous para. 2, amended - SG, issue 18 of 2011) After the expiry of the period under para. 2, the consumer shall have the right to terminate the contract and to have the amount paid refunded or to request a reduction in the price of the consumer goods in accordance with Art. 114.

(4) (Previous para. 3 - SG, issue 18 of 2011) The consumer shall be free of charge to bring the consumer goods into conformity with the sales contract. He shall not be liable for the costs of shipping the consumer goods or for materials and labour related to their repair, and shall not suffer any significant inconvenience.

(5) (Previous para. 4 - SG, issue 18 of 2011) The consumer may also claim compensation for the damage suffered as a result of the non-conformity.

**Art. 114.** (1) In the event of non-conformity of the consumer good with the sales contract and when the consumer is not satisfied with the resolution of the complaint under Art. 113, he shall have the right to choose between one of the following options:

1. termination of the contract and refund of the amount paid by him;
2. reduction of the price.

(2) The consumer may not claim refund of the amount paid or a reduction in the price of the good when the trader agrees to replace the consumer good with a new one or to repair the good within one month of the consumer's complaint being submitted.

(3) (New - SG, issue 61 of 2014, effective 25.07.2014) The trader shall be obliged to satisfy a request for termination of the contract and to refund the amount paid by the consumer, when, after having satisfied three complaints of the consumer by carrying out repairs to the same goods, within the term of the guarantee under Art. 115, there is a further occurrence of non-conformity of the goods with the sales contract. (4) (Previous para. 3 - SG, issue 61 of 2014, effective 25.07.2014) The consumer may not claim termination of the contract if the non-conformity of the consumer goods with the contract is insignificant.

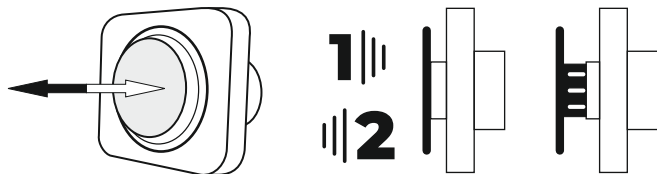

**Art. 115.** (1) The consumer may exercise his right under this section within a period of up to two years, counted from the delivery of the consumer goods.

(2) The period under par. 1 shall cease to run during the time necessary for the repair or replacement of the consumer goods or for reaching an agreement between the seller and the consumer to resolve the dispute.

(3) The exercise of the consumer's right under par. 1 shall not be subject to any other period for bringing a claim other than the period under par. 1.

### FLOW RATE ADJUSTMENT

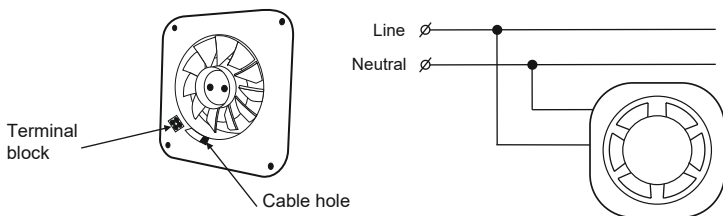

Depending on whether you want a higher or lower flow rate, pull the decorative cap forward or push it back (there are two slots in the fan housing where it fits). When pulled to the front position, the flow rate is highest.

### 2.2 ELECTRICAL CONNECTION

2.2.1 Connect the fan to the power supply (230V~, 50Hz).

**CAUTION:** The electrical connection must be made by a qualified technician with the power supply fuses switched off.

- a. Pass the power cable through the cable opening in the fan housing;
- b. Connect the wires to the terminal box, following the connection diagram, and make sure they are securely fastened.

### 3. OPERATION AND MAINTENANCE

If all the instructions in this manual are followed correctly, the fan can be put into operation.

### 4. MALFUNCTIONS AND THEIR REMOVAL

For any possible malfunctions of the fan during operation, it is recommended that you contact the manufacturer. During the warranty period, you can submit the fan for a complaint at the store where it was purchased.

### 5. STORAGE AND TRANSPORT

The fan should be stored in rooms at a temperature not lower than 5°C and humidity not higher than 80%.

Transportation should be carried out in closed vehicles or containers that protect against impact and vibration.

## PRODUCT PASSPORT

### HOUSEHOLD FANS SERIES MM RING 100

Add a touch of color to your bathroom or toilet with our **MM RING** series, which allows you to choose from 5 color rings. This model allows you to adjust the flow rate in 2 modes, by pulling or retracting the decorative cap. They are designed for installation in ventilation openings with dimensions of Ø100 mm. They are used for continuous or intermittent ventilation of small and medium-sized household, toilet and commercial premises.

Mounted on a wall or interior walls.

Can be used in adjacent rooms as a heat exchanger.

### Technical specifications

	Hz / V	W	m³/h	IP	dB	Zone
<b>MM RING 100</b>	50 / 230	17	105/80	24	35	2,3

#### • Insulation class - "F"

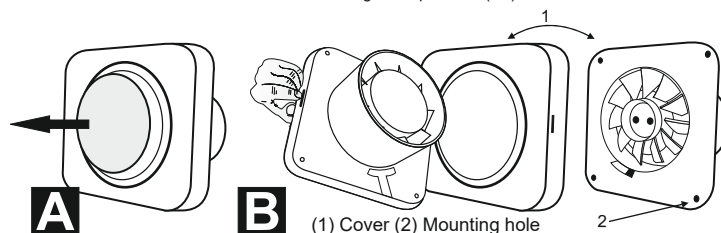

#### 1. OPERATING CONDITIONS

The fan is designed to operate in moderate climate zone "N" at temperatures ranging from -10°C to +40°C.

#### 2. PREPARATION FOR OPERATION

##### 2.1 INSTALLATION

- a. Remove the front decorative cover by pulling it out (A);
- b. Release the front grille by pressing with your finger on the spot shown in the picture and then release the grille (B1);
- c. The fan is secured with dowels in the mounting holes provided (B2).

## WARRANTY CARD

Type:

Serial No:

Seller:

Date:

Buyer:

The manufacturer's warranty is valid for 60 months from the date of purchase of the product, which the buyer proves with a warranty card and original invoice (or fiscal cash register receipt), with the following information filled in on the warranty card: buyer's name, date of purchase, signature and stamp of the merchant who made the sale.

The warranty does not apply to damage caused by: improper transport, poor storage, improper use, improper installation, attempted repair by the customer. In all cases where damage to the fan housing is found, it is assumed that the damage was caused by the customer.

The fan must be installed by a qualified electrician in accordance with the attached connection diagram.

**Territorial scope:** Republic of Bulgaria

#### WARNING!

Take precautions to prevent gas backflow into the room from gas vents or other fuel-burning appliances!  
This appliance is not intended for use by persons (including children) with limited physical, sensory, or mental abilities, or with insufficient experience and knowledge, unless they are supervised or instructed in the use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance!

 The crossed-out wheellie bin symbol on the appliance indicates that all electrical and electronic products and equipment must be taken to a special collection point at the end of their useful life. Do not dispose of these products as household waste, which is not subject to separate collection. They contain hazardous elements that have a harmful effect on the environment and human health. Hand them over for recycling.
